No. 5 Nassau Street, New York,

RECOMMEND TO INVESTORS THE

FIRST MORTGAGE BONDS OF THE

THE CENTRAL

Pacific Railroad Co.,

This Company is constructing, under the patronage of the UNITED STATES GOVERNMENT

THE WESTERN END OF THE

GREAT NATIONAL RAILWAY ACROSS THE CONTINENT.

Their line will extend from Sacramento, California, across the Sierra Nevadas to the California State line, traversing the RICHEST AND MOST POPULOUS SECTION OF CALIFORNIA, and thence through the GREAT MINING REGIONS OF THE TERRITORIES, to the vicinity of Salt Lake City.

It forms the **sole Western Link** of the only route to the Pacific which is adopted by Congress and aided by the issue of **United States Bonds**.

Their road is already completed, equipped, and running for 94 miles from Sacramento to within 12 miles of the summit of the Sierras, and a large amount of the work of Grading, Tunneling, &c., beyond that point has been accomplished.

The **First Mortgage Bonds** of this Company afford unusual inducements of Safety and Profit to investors, for the following among other reasons, viz:

FIRST.—The rate of Interest is **Six per Cent. in Gold**, payable semi-annually in the City of New York.

SECOND.—The **Principal** is payable in **Gold** at maturity.

THIRD.—The cost of the Bonds, **Ninety-five Per Cent.** and accrued interest, is **Ten Per Cent.** less than that of the cheapest Six Per Cent. Gold Bearing Bonds of the Government.

FOURTH.—The **United States Government** provides nearly half the amount necessary to build the entire road, and looks mainly to a small percentage on the future traffic for re-payment.

FIFTH.—Owing to this liberal provision, accompanied with **Extensive Grants of Public Lands**, by which the Government fosters this great national enterprise, its success is rendered certain, and its financial stability is altogether independent of the contingencies which attend ordinary Railroad enterprises.

SIXTH.—The Security of its **First Mortgage Bonds** is therefore ample, and their character for safety and reliability is equalled only by that of the obligations of the **Government itself**.

SEVENTH.—The net earnings of the completed portion are already largely in excess of the interest obligations which the Company will incur on twice the distance, and are steadily increasing, rendering the **uninterrupted payment of the Interest absolutely certain**.

EIGHTH.—At the present rate of Gold they pay nearly **Six Per Cent.** per annum, on the amount invested.

The Bonds are issued in denominations of \$1,000 with semi-annual Gold Coupons attached, payable in New York, and are offered for the present at 95 per cent, and accrued interest (in currency) from January 1st.

Orders may be forwarded to us direct, or through the principal Banks and Bankers in all parts of the country.

Remittances may be made in drafts on New York, or in Legal Tender Notes, National Bank Notes or other funds current in this city, and the bonds will be forwarded to any address by express, free of charge. Inquiries for further particulars, by mail or otherwise, will receive punctual attention.

GENERAL OFFICES:

No. 74 Cedar Street, New York,

AND

No. 46 St. Peter Street, Quebec.

This Company has purchased all the Mineral Rights on the Seignior of Rigaud-Vandred, in the Province of Quebec; and about the first of June, will commence practical operations by making mineralogical surveys, by shafting and tunnelling the quartz ledges, and by testing the quality of the rock in their Stamp Mill, just completed. The area of the Seignior is 108 square miles, and the quartz veins are of unusual width and extent, furnishing a basis for the profitable employment of large amounts of capital in separate organizations; and as fast as the Company's surveys and tests shall show the best locations for new mills, they will furnish Maps and propose liberal terms to parties desiring to develop mines on their own account. Contracts are now being made for the working of Placer Mines, which have already been abundantly proven to be of great richness.

Full information can be obtained at either office of the Company, or of the local agent, Mr. Truman Coman, on the property.

BUSINESS ENTERPRISE AND THE MONEY MARKET.

Among the topics for discussion the condition of the money market claims just now an unusually prominent place. The long continued lull in commercial enterprise, the general dullness of business, and the fact that in 1837, 1847, and 1857 this country was ravaged by financial panics, have led a few persons to anticipate that the current year will not close without a serious revulsion. And though it would be easy to show that the existing state of our monetary machinery is unfavorable to the fulfilment of these predictions of disaster, still as the laws of funds are imperfectly understood, and by most people are much misunderstood, it is no wonder that distrust is generated, and that an anxiety pervades all classes of our people, not to venture out of their depth, or risk monetary engagements beyond their assured means.

When, a few months ago, the credit machinery of the country was working at "high pressure," we warned our readers against the dangerous results to be apprehended from over expansion. Now the people, with the usual tendency

to excess, seem to have rushed into the opposite extreme of "low pressure," as is shown by the recent low aggregate of manufacturing and other productive industries. There are however, some symptoms of a reaction. We have a prospect of ample crops. The earnings of the railroads show an improvement. Many other circumstances contribute to foretoken that the depression of several months past with its enforced quietude will give place to a more gratifying activity. The Luxemburg question being settled in a pacific manner, almost the only cloud of uncertainty which hangs over the favorable vaticinations comes from the direction of the money market. If we have stringency there, the other conditions of resuscitated business will be present in vain. What then is the prospect? Will money be easy for the 5 or 6 months which must elapse before the usual activity sets in in the fall, or will there be during that interval a series of interrupting embarrassing spasms of temporary stringency?

To answer this inquiry we may look first, at the supply of floating capital seeking employment in the loan market. And no one can doubt who is conversant with the facts that the accumulation is unusually large. It is true that a good deal of this capital is investing itself in Government securities, and that from this movement the proportion between the floating and fixed capital of this country has undergone some changes since the addition of 2,000 millions of United States bonds to the mass of pre-existing investments for the savings of the people. But, by a singular and beneficent law, the multiplication of safe investments in any rich, thriving country increases the rapidity with which the capital of that country augments. Thus the reservoirs of floating capital are now fuller than formerly, besides being more capacious and more rapidly supplied. Hence it happens that notwithstanding the prodigious aggregate of fixed capital which has gone into Government bonds, the floating capital of the country is as large or larger than ever. And not only our banks, trust companies, and other lending institutions have abundant means to meet large demands for accommodation; but in consequence of the obstruction of the outlets for employing capital in business, many of our large merchants and importers are large lenders of surplus funds. So far then as the supply of idle capital is concerned, we may expect an easy money market.

Secondly, as to the abundance of currency, there is never at this time of the year any difficulty, for the flow of greenbacks sets strongly towards this city, and the tendency is for bank notes to accumulate to an extent even beyond what is salutary or convenient. It is true that the movements of the currency may, during this Summer, suffer a little disturbance from the heavy business of the Treasury. Next month the income tax is payable, and, with the other internal taxes, will withdraw some 40 millions out of the channels of the circula-

tion. But these payments will be widely distributed, and the disbursements will be rapid on account of the heavy amounts of seven-thirties that are being purchased by the Treasury for cash, and of the compound notes, of which 8 millions mature in June, and 12 millions in July, all of which the Secretary has announced his willingness to pay off on demand. From these and other causes the disbursements from the Treasury will probably equal the receipts, and no serious hindrance to business or perturbation of the markets is to be apprehended from the locking up of currency in the Treasury.

Exempt, as we shall thus be, in all probability, from two of the chief causes of financial stringency—deficiency of available capital seeking investment, and derangement of the currency by the movements of the Treasury—we may fairly anticipate an easy money market except, indeed, the general confidence should be impaired by further failures in the South or elsewhere. So far, however, these failures have only served to show on how firm a basis the credit machinery of the country reposes. Outside of a narrow circuit the suspension of Watts, Crane & Co. for six millions, and that of Fraser, Tranholm & Co. for four millions, scarcely produced a perceptible tremor, although these failures were so suddenly announced, so wide in their influence and so vast in the amounts involved. The fact appears to be that our commercial classes generally have prepared for financial reverses, and have strengthened themselves in all possible ways. But it must be remembered that, though a ship under bare poles may scud through a storm, yet in fairer weather, for purposes of navigation and commerce, risks must be taken, and as much sail carried as wise seamanship will justify. To err from timidity or ignorance in the one case is almost as fatal as to err from rashness and incapacity in the other.

THE FATE OF MEXICO.

It is rarely that war results in any real amelioration of the condition of a people. The cases are few indeed in which its costs do not largely exceed its compensations. Civilization owes much more of its interruptions than of its progress to this cause. Indeed, being the carnival of passion and the revelry of ambition, its results could scarcely be otherwise than detrimental to humanity and progress.

The struggle in Mexico affords poor promise of an issue exceptional to this rule. The contest was started for the ostensible purpose of substituting chronic anarchy by stable and effective government; it appears likely to end in the perpetuation of social confusion. Accounts from the seat of war are so contradictory that little can be definitely affirmed as to the situation of affairs; it may, however, be safely concluded, from the general tenor of accounts, that the final overthrow of the imperial government is but a question of weeks. The disregard for the laws of civilized warfare which characterises the operations of the liberals shows how far passion is gaining the ascendancy in the contest, and foreshadows the lawless condition of affairs which may be expected to succeed. The factions and the bloodthirsty propensities of the Mexican people have been thoroughly aroused, and the circumstances admit of little hope that social order will follow the extinction of imperialism. Maximilian represents a faction which, though in a minority, will never long cease to oppose a liberal form of government. His adherents are now fighting less for their Emperor than for the ascendancy of the church party and the upper classes; and though their cause under its present leadership may fail, their submission will be made with a sullen resolution to seize the first occasion for recovering their ascendancy. Besides the hatred between the factions of even the liberal party are too bitter and fundamental, and are too little under the check of civil-

ized sentiment to admit of the political parties of the country co-operating harmoniously under a free form of government; and, after five years of fierce warfare, the possibility of harmony is more than ever remote. Few of those who have been drawn into the armies will return to the pursuits of industry, and the country will be harrassed by a large accession to the ranks of the lawless and plundering population.

It will scarcely be questioned that this is a fair representation of what *will be*, in the event of the final success of the liberals. Is it improper to ask what *would have been* in the event of France continuing her support of the imperial cause? Without entering upon the abstract question of forms of government, it may be safely affirmed that the continuance of the French troops in Mexico would have given the country a government capable of controlling the lawless habits of the people. If political rights had been subjected to the dictation of the government, the rights of property would have been secured; the safety of the person would have been secured; capital would have found employment in developing the splendid resources of the country, and society would have been arrested in its rapid reaction toward barbarism. It would be a poor objection against these vital advantages to say that they would have been conferred by the strong hand of power. Surely civilization under a despotism is to be preferred to a semi-barbarism under a demoralized republic.

It is not very gratifying to reflect that we are chiefly responsible for the unfortunate course into which affairs are drifting. The departure of France from Mexico is due to the energy of our protest; and if the Mexicans relapse into a condition of anarchy it will be for no other reason than that we refused to allow them to be coerced into order. It was doubtless very undesirable that we should have the representative of a European dynasty enthroned upon our borders; but were we justified in objecting to France establishing order in Mexico without being prepared to contribute that result ourselves? Our policy has been wholly selfish. We have cared nothing for neighbors so long as we could keep a foreign prince from our door. It is futile to urge that we have protected Mexico against having her freedom trodden down by an invader, so long as the Mexicans are incapable of governing themselves. To say that we saved their liberties means that we have perpetuated their anarchy. To liberate them from restraint is to enable them to commit suicide. Mexicans may thank us for this questionable boon, but history will hold us responsible for a grievous political wrong. It may be said with much truth, that the mode and time of the French intervention was so offensive to us that any other course than that taken by the government was scarcely admissible; and we think that if it be granted that the end we sought was desirable or necessary, the Secretary of State is entitled to great credit for the course he pursued to accomplish it. Still the result is that so far as Mexico is concerned, anarchy is about to be substituted for what was fast becoming a stable government, and we must, in a great measure, be held responsible for the event.

There appears to be a partial awakening of the public conscience upon this question. Indications are apparent of a disposition to ask whether we are not bound to do something toward mitigating the misfortunes which our policy has brought upon Mexico. Whether this question is likely to be raised by the Government or in Congress we are not prepared to say; we presume, however, that it will be ultimately decided rather upon grounds of ability and of expediency than upon considerations of moral obligation. Clearly it would be only adding folly to wrong to attempt to identify ourselves with Mexican interests. At present, it takes all our resources of statesmanship to take

care of ourselves. We have nothing to spare for Mexico, either in the shape of money or men. Our taxation has reached the limit of endurance, and yet the extravagant schemes of our legislators render an increase of our burthens inevitable. We cannot afford to undertake a protectorate, however informal, over Mexico; for the result would be to entangle us in the affairs of our neighbors without any compensating advantage. The Mexicans are sadly impoverished, and are not likely to reimburse us for any expenditures we might incur on their account. As yet, we have kept ourselves clear of foreign incumbrances, and it will be fatal to our tranquility when we depart from that wise policy; for any interference in behalf of government and order in Mexico must be undertaken with a distinct understanding that the end of our intervention would probably be the annexation of the country to the United States. The incessant outbreaks incident to Mexican politics would ultimately throw the whole onus of government upon ourselves, and we should find no other way out of our complications than by taking absolute possession of the country, with all the cost and annoyance of keeping eight millions of half civilized lawless population in order, and with the dangerous necessity of governing them by the sword, to say nothing of the liability for foreign claims. Intervention, therefore, by the United States alone is not to be thought of, nor are we prepared to indicate what course should be pursued. For the present, however, we must await further developments, and eventually it is possible that, if anarchy continues to reign, and no better remedy be suggested, a joint intervention on the part of the United States and other powers interested for the simple purpose of enforcing order, may be thought desirable.

TRADE OF GREAT BRITAIN AND THE UNITED STATES.

COTTON, BREADSTUFFS, PROVISIONS, ETC.

The British Board of Trade returns for the first quarter of the present year indicate that notwithstanding the apparent slackness which has existed in Great Britain for the last few months, the export trade of the country is still quite satisfactory. In comparing these figures, however, with those for 1866, it should be remembered that the trade of the United Kingdom last year was more than usually animated. Very large purchases were then being made by ourselves, the declared value of the exports to United States ports, in the first three months being as much as £8,000,000, against only £3,000,000 in 1865. This year, in the same period, the shipments have reached a total value of £6,113,600, so that, as compared with 1866, there is a diminution of nearly £2,000,000, but as compared with 1865, an increase of rather more than £3,000,000. Neither of these comparisons, however, can be considered fair, for during 1865 our purchases were much below the average, while last year our merchants were taking more than an average supply. If therefore, we extend the comparison to the year of 1864, we shall find that the declared value of the exports of British and Irish produce and manufactures to the United States was £6,500,000, showing a diminution this year of £400,000 only. This country still ranks as the best customer that England possesses for her manufactures, nearly one-fifth of the total shipments being on United States account.

The principal decline in the exports to this country in the first three months of the present year is in cotton piece goods, which show a falling off to the value of £410,000, in linen piece goods £463,000, and in woolen and worsted manufactures £789,000. Haberdashery and millinery, cutlery, linen thread, bar iron, wrought iron, iron hoops and boiler plates, tin plates, silk manufactures, and alkali, also exhibit a considerable reduction; but, on the other hand, there is an import-

ant augmentation in the shipments of railroad iron, the increase in the export of this article being nearly £233,000. In the annexed statement will be found all the leading articles of export to the United States, together with the aggregate value of these shipments hence during the first three months of each of the last three years:

The import of cotton in March was 883,840 cwt., of which 512,988 cwt., were from this country, 228,871 from Egypt, and only 50,521 cwt. from the East Indies. The total supply received last year was 872,827 cwts., and in 1865, 621,673 cwt. For the first three months of the present year the imports were 1,815,219 cwts., against 2,026,409 cwt. in 1866, and 1,433,274 cwt. in 1865. Annexed are the particulars of these imports:

BREADSTUFFS.

At the date of our latest advices, the wheat trade in England was very quiet, but very firm. This arose out of the circumstance that a considerable inroad had been made into the stocks of old wheat, which had been held over from the fine harvests of 1863 and 1864, but as the weather was fine, and as the harvest prospects were good, while the imports from foreign countries were on such a scale that supply and demand were pretty equally balanced, millers exhibited great caution in making purchases, and hence the quietness of the trade. So long as the state of the weather justifies millers in believing that a good crop of wheat may be anticipated, there seems to be no doubt but that they will continue to pursue their present cautious policy. It may therefore be expected that, with the prevalence of fine weather, the wheat trade in England will assume a position for several weeks quite devoid of interest; but if unfavorable weather intervene, between now and harvest, there seems to be room for a considerable rise in prices. In the Board of Trade returns, this country still continues to exhibit a very inferior position with regard to our shipments of cereals. In the first three months of the present year, out of a total import of wheat of 6,061,852 cwt., 2,789,245 cwt. were received from Russia, 901,117 from Prussia, and only 508,244 cwt. from this country. The total import of flour was only 885,183 cwt., being nearly 1,000,000 cwt. less than in 1866, and of this quantity only 59,560 cwt. were received from the United States. The annexed statement shows the imports of cereals into the United Kingdom from January 1 to March 31, 1865, 1866 and 1867:

[From our own Correspondent.]

LONDON, Saturday, May 11, 1867.

The closing days of the present week exhibit a very favorable contrast with those of the corresponding week last year. Twelve months have now elapsed since Overend, Gurney & Co., limited, failed, and although it cannot, even at this date, be said that we have wholly recovered from the crisis, still a perceptible improvement has recently taken place, the various Stock Exchange markets being characterised by considerable activity, with an important rise in the quotations. That caution, however, which has been so prominent a characteristic in commercial circles for a long period is still an existing fact, and although business shows a disposition to extend itself into legitimate channels, the transactions in produce and manufactures continue to be chiefly of a hand-to-mouth character. Still without doubt confidence is being gradually restored though very slowly, as would naturally be the case after so great a collapse as took place in so many quarters of the globe in 1866. At certain periods, many of our markets suddenly become quite animated, and without making due consideration, we are led away with the idea that all difficulties have been overcome, and that we are now on the way to a speedy return to active and remunerative trade. Such, however, is the sensitiveness prevailing here, that this recovery receives a check as rapidly as it was obtained, and then the respective markets subside into a state of comparative gloom, to be, in their turn, changed into buoyancy and activity on the return of favorable rumors, however slight. Such has been the case this week in regard to the Liverpool and Manchester markets. In the early part of the week, these markets, and more especially the former, were characterised by considerable animation, and rather an important amount of business was transacted. The suspension of Messrs. Given, Watts & Co., of New Orleans, Messrs. Watts, Crane & Co., of New York, and Messrs. W. C. Watts & Co., of Liverpool, caused these markets to assume a less satis-

factory position, but the effect has been more apparent at Manchester than at Liverpool. At the latter the dulness of tone, and slight depreciation in prices were merely temporary, and only lasted during the earlier hours of business; but at Manchester, the announcement has led to much more caution and circumspection being observed. So that the actual amount of business transacted during the present week is only moderate. Several weeks since I observed that the great depression which then existed in the cotton trade could not last much longer. I inferred this from the fact that the stocks of goods abroad were getting low, and, therefore, that a larger export trade might be anticipated with the natural recovery of the fall in prices which had taken place. Those anticipations have required a longer period to be realised than anticipated. It would seem, however, that such a result would have been obtained before this had it not been for the Luxemburg difficulty, which had so disastrous an effect upon many of our markets. The efforts of the Members of the Conference having proved successful, and the hope somewhat generally entertained that an enduring peace in Continental Europe will be secured, have produced a most salutary effect, the result being that there are manifest signs, not only of increasing confidence, but of more extensive trade. At the same time, it may be observed, that our colonial advices are, on the whole, much more encouraging. In Australia, indeed, business is still very sluggish, and it will probably be a long period before we witness a renewal of confidence at Sydney, Melbourne, and Adelaide; but, as regards the East Indies, the future is not only looked forward to with the greatest hope, but the present condition of affairs there is calculated to have an important influence in tending to restore animation here. Our latest advices from Bombay state that the commercial aspect at that point is most favorable; confidence has very materially increased, and the profits in commercial transactions are larger and more certain than for many months past. The supplies of East Indian cotton afloat are considerable, but much below last year. Nevertheless, cotton is arriving at Bombay somewhat freely from the interior, and shipments are progressing at a somewhat rapid rate.

Respecting the crop of cotton in the East Indies, a report has recently been published relating to the Northern division of the Bombay Presidency, written by Mr. W. Walton, the acting cotton commissioner. From this report, we learn that in the Northern Division the increase in area for 1866-7 is, for exotic cotton 98½ per cent., subject to a decrease in native growth of eight per cent. Then as to out-turn: the increase in the Southern Division was, for indigenous cotton 21½ per cent., and for exotic 27½; but in the northern portion of the presidency the increased yield this year in 1865-6 is, in exotic cotton 370 per cent., subject to a decrease in the native variety of 12 per cent. This enormous increase in the better variety is due nearly as much to improved yield as to increased breadth under cultivation. In the Southern Division the increase of land under cotton cultivation in 1866-7 is, in exotic cotton 17 per cent., and in native 7 per cent. There are now under cotton cultivation in Bombay, 1,978,128 acres of land, of which 751,814 acres are planted with exotic cotton. These figures show an increase of 54 per cent as compared with last year.

Our agricultural prospects this year appear, so far, very favorable, and an abundant harvest is anticipated. There can be no doubt that the quantity of land under wheat cultivation has increased. This would naturally be the result of the high prices current at the completion of last harvest, and the large inroad made into the farmers' stocks of old wheat. But besides this the appearance of the country shows that the cultivation has actually increased. During the last few days, owing to the brilliant weather, there has been much less activity in the trade, and millers have operated with extreme caution. This is, indeed, the policy they have pursued during the whole of the year, and one which they are likely to follow so long as our harvest prospects continue good. Under a fair importation, there can be no doubt that the tendency of prices will be downwards. But the stock of wheat in this country is below the average, and with a fair importation, which is all that we can expect, supply and demand seem pretty equally balanced. There appears, therefore, to be no room for any material fall in prices. On the other hand, should our crop prospects be of such a nature that rather less than an average crop can only be looked forward to, a higher range of prices is not unlikely to be established.

We are now enabled to ascertain the extent of our importation of Wheat into the United Kingdom in April, and during the four months ending April 30. I may observe that the return for the month embraces a period of four weeks, and not of thirty days, so that the figures given are somewhat approximate, and are not likely to correspond exactly with those of the Board of Trade returns, which will not be published for about three weeks. They show, however, that our imports of wheat in April were large, and considerably in excess of last year. The import for the four months is about 9,000,000 cwt., being nearly 3,000,000 cwt. in excess of the corresponding period of 1866. Of flour,

however, owing to the great diminution in our receipts from France and America, there is a decline of 1,200,000 cwt. The statement is as follows:

It was thought by many in London that not only had the lowest price of money been reached, but that there was a tendency to higher quotations. This opinion had been formed in consequence of an active demand having existed for a period of about two weeks. It was supposed that the supply had been diminished, and that a steady upward movement was about to take place. Three circumstances contributed to this increased demand, viz., revenue payments, the "fourth" of the month, and the arrival at maturity of a large amount of Indian paper. These demands upon the market, therefore, were but temporary, and now that they have been all met, there is less animation, and a return to continued ease. With regard to the supply, it would seem that in consequence of the war rumors, and of several unfavorable reports respecting Liverpool houses, the banks and discount houses were exhibiting more caution, and greater difficulty was therefore being experienced in obtaining advances on second-rate paper. The falling off in the supply was apparent and not real, for the market is still well supplied. Many are disposed to look upon an increasing demand for accommodation as indicating a less favorable state of affairs, and Consols generally become weaker when such is the case. Annexed are the quotations for discount, so far as the best descriptions of paper are concerned:

	Per Cent.		Per Cent.

On the Continent, the principal changes in the rate during the week have been at Madrid and Hamburg, at both of which cities there has been a decline in the quotations. The supply of bullion in the Bank of France is now £31,840,000; and as the requirements of the commercial body in France are likely to be comparatively small for some time to come, there is no immediate prospect of permanent stringency in the money market. Annexed are the quotations at the leading cities at this date and at the corresponding period last year:

	B's rate— 1866. 1867.	Op. m'tk— 1866. 1867.		B's rate— 1866. 1867.	Op. m'tk— 1866. 1867.

Very little of importance has transpired in the bullion market. Gold is in fair demand for export, and further supplies have been withdrawn from the Bank of England. Several gold ships are now due from Australia, and at present it seems probable the supplies they convey will be sent to the Continent. Exchange from Bombay comes low, and there is no heavy demand for remittance to the East. As regards silver, the principal purchases are on Continental account.

The Conference having arrived at a peaceful solution of the Luxemburg difficulty, the rates of foreign exchange are more favorable to this country.

The tone of the consol market has been firm. The public continue to make investments, which, coupled with the more favorable political aspect with regard to the Continent, and the approaching settlement of the question of reform have tended strongly to enhance the quotations. A fair amount of business has been transacted. Yesterday the market was very firm; but to-day there is a slight reaction. Annexed are the highest and lowest prices each day during the week:

Week ending May 4.	Monday.	Tuesday.	Wed'y.	Thur.	Friday.	Sat.

At the commencement of the week the market for American securities was very quiet; but with the more favorable political aspect, a better tone has been apparent during the last two days, and the quotations have experienced a considerable rise. United States Five-twenty bonds are much less freely pressed for sale on German account, and prices have improved to the extent of about one per cent. United States Five-twenty bonds close this evening at 72 to 72 1/2; Erie Railway shares, 42 to 43; Illinois Centrale, 76 to 76 1/2; and Atlantic and Great Western consolidated mortgage bonds, 21 to 22. The highest and

lowest prices of American securities on the days enumerated are subjoined:

EXCHANGE BY THE TREASURER OF REGISTERED FOR COUPON BONDS.—The following is the explanation of the Secretary of the Treasury of the recent exchanges made of registered United States bonds:

TREASURY DEPARTMENT,
OFFICE OF COMPTROLLER OF THE CURRENCY,
WASHINGTON, May 20, 1867.

SIR—In response to your verbal inquiry, I have to state that under the National Currency act of February 25, 1863, national banking associations were authorized to deposit with the Treasurer of the United States any certificates of the funded debt of the United States, whether coupon or registered, as security for the redemption of circulating notes. Under this act about \$17,500,000 of coupon Five twenties of 1862 were so deposited.

The act of June 3d, 1864, provided that registered bonds only should be received and held as security for such notes. After the passage of this act, all banks having coupon bonds on deposit with the Treasurer were notified that they would be expected to have such bonds converted into registered bonds; and this was done to a very general extent. Subsequently, those banks which had neglected to comply with these requirements, were notified that the Department objected to having the custody of coupon bonds as security for circulation; that it was the object and intention of the law that registered bonds only should be held by the Treasury for that purpose, and they were requested to take immediate steps for the conversion of their coupon bonds, under the penalty of having the payment of interest suspended until it was done.

Within a few months past a number of these banks made application to have their Five-twenties of 1862 returned to them in coupons bonds. In consideration of the fact that they were converted into registered bonds under compulsion, and that the banks should not be compelled to suffer pecuniary loss by the action of the department, I recommended, as an act of justice, that they should be permitted to withdraw their Five-twenties of 1862, and that clean coupon bonds should be issued to them in lieu of the registered bonds into which their coupons had been converted. Upon the representation of the facts in the case, and also upon the statement of the Register of the Treasury that he had a limited amount of coupon Five-twenties of 1862 on hand that had never been issued, you consented that the exchange should be made, upon condition that the bank should furnish Seven-thirties of the first series for conversion into consolidated Five-twenties at the Treasury Department, without the agency of brokers or the payment of any commissions to the government for such conversion.

The total amount of coupons of 1862 thus issued to the present date is \$2,872,500. I am informed by the Register of the Treasury that he has but \$2,447,100 remaining, and as you stated at the time the arrangement was made that you would have no additional bonds printed for that purpose, I presume these exchanges will be limited to the amount now on hand.

Very respectfully,

H. R. HULBURD, Comptroller.

Hon. HUGH McCULLOCH, Secretary of the Treasury.

Below we give the section of the National Currency Act under which this exchange is made:

SEC. 7. And be it further enacted, That the Secretary of the Treasury is hereby authorized to issue, upon such terms and under such regulations as he may from time to time prescribe, registered bonds in exchange for, and in lieu of, any coupon bonds which have been or may hereafter be lawfully issued; such registered bonds to be similar in all respects to the registered bonds issued under the acts authorizing the issue of the coupon bonds offered for exchange. And for all mutilated, defaced, or indorsed coupon or other bonds presented to the department, the Secretary of the Treasury is authorized to issue, upon terms and under regulations as aforesaid, and in substitution thereof, other bonds of like or equivalent issues.—Act of June 30, 1864.

FRIDAY, May 23, 1867, P. M.

THE MONEY MARKET.—The advance in the rate of interest noted at the close of last week, has proved to be but temporary. The demand for loans has been strictly moderate, and since Monday the rate on call loans has ruled at 5 per cent on stock collaterals, and 4 per cent. on Governments. The Sub-Treasury, however, has again largely increased its balances, the balance this afternoon being \$132,700,000, against \$125,000,000 on Thursday of last week, and \$110,000,000 on the 6th of May. As yet this withdrawal of currency from the banks has produced no perceptible effect upon the market; but unless the current be reversed, it is quite probable that the rate of interest may show more firmness; especially as the receipts of money from the interior exhibit a slight decline. This probability would be increased should the present downward movement in the stock market be continued; as the banks would be apt to call up margins upon stock loans, thereby increasing the demand for money.

The accumulations of idle money cause an active demand for the new Sixty-fives at the Treasury, and the large current sales are rapidly absorbing surplus funds. This movement cannot be much longer continued without causing a partial reaction from the present ease of the market. Shortly, however, the Treasury will have to disburse several millions in the way of interest upon Seven-Thirty Notes.

Discounts are easier. There is a great scarcity of really prime paper, the more conservative merchants being indisposed to put out notes. The best class of paper at present upon the market ranges at 6¼@7½ per cent., for 3 to 6 months dates; very choice names, however, would pass at rather lower figures. Dry goods auction and other single name notes are current at about 7¼@9 per cent.

The following are the quotations for loans of various classes:

	Per cent.		Per cent.
Call loans	4 @ 5	Good endorsed bills, 3 & 4 months	6½ @ 7½
Loans on bonds & mort.	6 @ 7	do single names	7½ @ 9
Prime endorsed bills, 3 months	6 @ 6½	Lower grades	10 @ 15

UNITED STATES SECURITIES.—The activity in Government Securities has been maintained throughout the week. Some moderate purchases have been made for shipment, and toward the close of the week there has been a very active speculative demand for Sixty-tuos, apparently based upon the scarcity of the bonds, and upon an anticipation of higher prices in Europe. Recent inquiries have elicited an official statement to the effect that the Treasury has exchanged Registered Sixty-tuos deposited at Washington by the banks, as security for their circulation, coupon bonds of the same character; but as the amount of bonds remaining on hand available for that purpose is quite limited, being below three millions, this fact cannot have any important bearing upon the value of coupon Sixty-tuos.

The sales of new Sixty-fives at the Sub-Treasury are still on a very large scale, and exceed its purchases of Seven-thirty notes materially, the holders of the 1st series of Seven-thirties being apparently disposed to hold out for the conversion of their notes into a bond bearing date from the maturity of the notes.

The Assistant Treasurer is prepared to receive Compound Interest notes of June and July dates either in the way of direct redemption, or in payment for new Sixty-fives, allowing for them par and compound interest to the date of presentation. As yet, however, no very considerable amount of the notes is being presented.

The foreign market appears to be moderately supplied with bonds; but an opinion prevails in some quarters that, notwithstanding the

low rate of money at London will induce an increased demand for them. The closing quotation for Five-twenties at London to-day was 72½.

RAILROAD AND MISCELLANEOUS STOCKS.—The stock market has exhibited a continuance of the weakness noted last week. Transactions have been limited; but toward the close of the week there was a marked disposition to sell, and to-day business closes with a very unsettled feeling, and at a material decline from the opening figures of the day. The clique which for some time has been manipulating Erie for higher prices is understood to have realized upon a large portion of its stock. The advance in the price has drawn from London a large amount of shares (stated at 10,000) within the present month; and this unexpected supply has probably been one of the principal causes of the breaking up of the "pool." This evening, after regular hours, the stock sold down to 58½. The whole market is weak in sympathy with the fall in this controlling stock, especially North Western common and preferred, in both of which there is a considerable "long" interest. Compared with our last quotations the fall in Erie is 4; Northwestern 2½, and preferred do. 3½; on other shares the decline ranges from 1 to 2 per cent.

The miscellaneous list is exceedingly weak. The outside public have become very distrustful of such stocks, and cannot be drawn into speculations connected with them. Cumberland is offered at 30, Quicksilver 25, and Canton 41½.

The following were the closing quotations at the regular board, compared with those of the six preceding weeks:

THE GOLD MARKET.—Gold has been, upon the whole firm, under the export movement in specie; but at the close of the week the dulness in the exchange market and the tendency of rates among the leading drawers to fall below the specie shipping figure, have caused holders to somewhat relax their firmness. The export movement this week has been much less than was expected, and it is now thought possible that the shipments may at once fall off to very moderate figures. The total shipments of specie and bullion from this port from May 4th to 22d was a little over \$7,000,000, and the amount to be sent out by to-morrow's steamer is expected to be somewhat over \$1,000,000.

The fluctuations in the gold market during the week closing with Friday are shown in the following table:

The movement of coin and bullion at this port for the week ending Saturday May 18, was as shown in the following formula:

Specie in banks Saturday, May 11.....	\$14,959,590
Treasury receipts from California.....	\$419,667
Imports of coin and bullion from foreign ports.....	133,907
Coin interest paid from U. S. Treasury.....	2,984,574

Specie in banks Saturday, May 18.....	15,567,263
Deficit made up from unreported sources.....	\$3,524,371

The large deficiency in the reported supply for the past two weeks has been made up chiefly from interest paid from the U. S. Sub-Treasury office. The whole amount so paid on the May coupons to the 18th inst. was \$13,945,000.

The transactions for the last week at the Custom House and Sub-Treasury were as follows:

	Custom House. Receipts.	Sub-Treasury. Payments.	Receipts.

FOREIGN EXCHANGE.—For both Wednesday's and Saturday's mails the demand for bills has been quite limited, and rates have been with difficulty maintained at the specie shipping point. The late active demand was chiefly for the remittance of balances, and has been very much caused by the amounts due on May coupons. The failure of Fraser, Trenholm & Co., Liverpool, had a temporary effect upon rates.

The following are the closing quotations for the several classes of foreign bills, compared with those of the three last weeks:

NATIONAL BANKS.—The Treasurer of the United States held on the 18th as securities for circulating notes, \$340,641,450 and as security for deposits of public moneys, \$38,902,950; total, \$379,544,400. The amount of National Bank currency issued during last week was \$11,250; total to May 18, \$302,822,206. From this is to be deducted the currency returned, including worn-out notes amounting to \$3,865,732; leaving in actual circulation at that date, \$298,956,474.

The Second National Bank of Chicago has voluntarily ceased to be a depository of public moneys, and has applied to withdraw the securities deposited with the Treasurer of the United States.

The \$12,000 in fifty and one hundred dollar notes of the First National Bank of Jersey City, stolen from the office of the Comptroller of the currency, were numbered, on the upper right hand corner, No. 19,600 to 19,689, on the lower left hand corner Nos. 671 to 750. Numbers the same on both denominations.

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, May 24.

The volume of trade has been generally good the past week, and there is less complaint that the returns of business are unsatisfactory. Many of the leading staples are relatively quite low, and dealers are enabled to realize moderate profits.

Cotton has declined, closing steady. Breadstuffs declined early in the week, but prices have recovered in most cases during the past day or two. Tobacco has been less active. Groceries have been variable. Coffee is rather lower in gold for common qualities. Sugar has advanced but closes with free sellers. Molasses has been fairly active.

Provisions have been in good demand, and prices are in most cases rather better. The trade and shipping demand for Pork is not large, but some speculative demand in new Mess has been developed the past day or two, and prices have recovered most of the decline that took place early in the week. Cut Meats and Bacon are in but moderate supply, and as holders are under no apprehension of the return of large quantities from England, as happened last summer, they are very firm. Lard has been in better demand for export, but closes rather tame; the fluctuations for the week have been unimportant. Beef is more active and firm, and we notice a movement to-day to the extent of 800 tcs. for the British markets. Cheese has been taken to some extent on English orders.

Hides have remained dull, and the only business in Dry Hides has been at $\frac{1}{2}$ c., gold, decline. Montevideo selling at 12c., gold. Leather is also somewhat lower.

Petroleum has further declined, but closed active. The business includes 20,000 bbls. Crude for June and July delivery at 10c. in bulk, and standard white refined closes at 25 $\frac{3}{4}$ c. in bond.

Naval Stores have been firmer but close quiet. Spirits Turpentine 64c., free, per gallon, and common Rosin \$4 per bbl. Oils have been quiet and unchanged.

In Metals, there has been but little demand except for Ingot Copper, of which sales foot up a million pounds at $23\frac{1}{2}$ @ $23\frac{3}{4}$ c.

East India Goods show a good demand for Calcutta Linseed, with sales at \$2 62½@2 66, gold, duty paid, per bush.; Gunny Cloth 11 cents gold, to arrive, in bond, and Gunny Bags 20¾c., currency.

Tallow has been active and firm. Fish have advanced, and Fruits are rather firmer. Whiskey firm at 35c. in bond.

Wool continues quiet, but prices rule very firm, with an upward tendency.

Freights have become very dull. The shipments of Grain and Cotton to Great Britain have nearly ceased, and the little done has been at nearly nominal rates. The shipments of Petroleum have also been less liberal. Considerable quantities of Naval Stores and Provisions have been shipped at low rates. Several deal charters have been made mostly from St. Johns, N. B., to Liverpool at 61s.@62s. 6d.

Receipts of Domestic Produce for the Week, and since January 1.

COTTON.

FRIDAY, P. M., May, 24 1867.

The receipts of Cotton this week from all the ports show a further material falling off, the total reaching only 14,854 bales (against 18,650 bales last week, 19,661 bales the previous week, and 18,008 bales three weeks since), making the aggregate receipts since September 1, this year, 1,712,851 bales, against 1,857,686 bales for the same period in 1865-6. The details of the week's receipts are as follows:

In the exports this week there is a considerable increase, total reaching 38,800 bales, against 27,264 bales last week. From the Southern ports the shipments for the week have been 29,163 bales, against 18,399 bales in our last report. Below we give the particulars of the week's shipments from all the ports:

The total foreign exports from the United States since Sept. 1 now amount to 1,297,484 bales, against 1,380,066 bales for the same period last year, and the present stocks are 355,213 bales, against 403,203 bales at the same time in 1866. Below we give our usual table of the movement of Cotton at all the ports since Sept. 1, showing at a glance the total receipts, exports, stocks, &c.:

* In this table, as well as in our general table of receipts, &c., we deduct from the receipts at each port for the week all received at such port from other Southern ports. For instance, each week there is a certain amount shipped from Florida to Savannah, which in estimating the total receipts must be deducted as the same shipment appears in the Florida return. We are thus particular in the statement of this fact, as some of our readers fail to understand it.

The market this week has been dull, declining steadily all the week, the closing quotations being 2c. lower than last Friday, Liverpool having also declined from 11½ to 11d. for Middling Uplands. The suspension of Messrs. Fraser, Trenholm & Co. has unfavorably affected the market, disturbing confidence, and materially adding to the difficulty of negotiating cotton bills, and thus checking shipments. At the same time spinners buy very sparingly, although the decline in goods may be said to be, for the moment at least, checked, and speculators appear also to have withdrawn, leaving the market in a very stagnant condition. The sales for the week are only about 7,500 bales, and the following are the closing quotations:

MOBILE, May 18.—By mail we have received one week's later dates from Mobile. The receipts for the week ending May 17 were 1,557 bales, against 1,927 bales last week, and the shipments were 1,487 bales, all of which were to New Orleans, leaving the stock on hand and on ship-board, not cleared, of 33,245 bales. The following are the weekly receipts, sales and exports for a series of weeks, and the stock, price of middling, rates of freight to Liverpool and New York, and price of gold at the close of each week:

The market has been rather quiet this week but prices are better. Factors have shown little inclination to sell, but prices are rather in favor of the buyer. We quote good ordinary at 28c., low middling 24c., and middling at 25c. at the close. Freight show no change. Liverpool 9-16d., and coastwise 3c. Exchange on New York closes at 4½¢, discount. Sterling Exchange 144 @ 146.

SAVANNAH, May 18.—The receipts for the week ending May 17 were 1,872 bales (of which 37 were from Florida), against 3,112 bales last week. The shipments this week were 5,046 bales, of which 3,322 bales were to Liverpool, 827 to Philadelphia, 61 to Baltimore, 211 to Charleston, and 1,115 bales were to New York. Below we give the receipts, shipments, prices, &c., for a series of weeks:

Date.	Receipts.	Shipm'ts.	Stock.	Price Mid.

The market has not been very active this week, but quotations have materially advanced under the improved Liverpool advices, but closes unsettled and dull, with middling at 26c. Freight have continued extremely dull. We quote to Liverpool 7-16d. for square, and 3d. for round bales; steam to New York and Philadelphia 3c., and Baltimore \$2 50 per bale. In sailing vessels the rates are dull at 3c. to Northern ports.

NEW ORLEANS, May 18.—The mail returns for the week ending May 17, show a small increase in the receipts, the total for the week being 4,800 bales, against 4,592 bales last week, and 5,127 bales the previous week. The shipments for the last week were 19,109 bales, of which 12,873 bales were to Liverpool, 1,140 to Havre, 983 to Narva Prussia, 524 to Barcelona, 2,269 to Boston, 291 to Philadelphia, 717 to Providence, and 312 to New York. Stock on hand May 17, was 115,547 bales. The receipts, sales and exports for a series of weeks, and the stock, price of middling, rates of freight to Liverpool and New York, and price of gold at the close of each week since April 5, were as follows:

The market this week has been quite active and prices better. The suspension of the First National Bank caused a feverish excited feeling in financial circles, which checked transactions somewhat on account of the increased difficulty of negotiating exchange. Middling closes at 27 @ 28c., and ordinary at 21 @ 22c. Domestic Exchange has ruled more decidedly in favor of buyers, bankers checking on New York at par. The rate for commercial has been selling at ¼ @ ½ discount for New York sight. Sterling Exchange closed at 149½ for bankers.

EUROPEAN AND INDIAN COTTON MARKETS.—In reference to these markets our correspondent in London writing under the date of May 11, states: *

LONDON, May 11.—The demand for cotton has ruled active during nearly the whole of the week, yet a steady fall in prices has taken place. The amount of business done is considerable, viz., 73,150 bales of which speculators have taken 2,300 bales, exporters 19,250 bales, and the trade 51,600 bales. To-day, as compared with Saturday last, the following changes are indicated: American a decline of ¼d. to ½d.; Brazilian, ¼d.; and East Indian ¼d. per lb.; but in other descriptions, there is no material change to notice. The following are the prices current, so far as regards American cotton:

TOBACCO.

FRIDAY, P. M., May 24, 1867.

The exports this week of crude Tobacco are considerably in excess of last week, though in the item of hhds. less than the two previous weeks. A very large movement, however, will be noticed in cases, New York having sent to Bremen alone 2,760 cases during the week. The receipts of tobacco are quite liberal at all the ports, and stocks are increasing. Below we give the shipments from all the ports for the week:

The market has been generally less active this week. The large business of last week seems to have supplied for the present the wants of buyers.

In leaf tobacco, Kentucky, Virginia, &c., the sales thus far for May foot up 5,200 hhds., but for the last few days the demand has been less active. Nothing further has been done on account of the French contract, and it is reported that the party holding the contract has already secured nearly or quite sufficient to fill it. There has been a steady demand for export to the Mediterranean and the north of Europe, at full prices.

In Seed Leaf the business has been much less brisk, prices remaining about as before. Sales embrace 19 cases Connecticut, crop of 1866, 14c.; 35 cases Connecticut, crop of 1864, 20@35c.; 28 cases Connecticut, 7@8c.; 61 cases Connecticut, crop of 1865, 11½c.; 250 cases Connecticut, various lots, 11@14c.; 47 cases Ohio, private terms; 65 cases Connecticut, crop of 1865, and 130 do., crops of 1865-'46, on private terms. Manufactured Tobacco has been quiet, and we hear of no transactions of moment.

Foreign Tobacco has been more active. The sales embrace 100 bales Havana at 87½c., and 180 bales do. at 102c.

Shipping Tobacco.—Lugs, very common and heavy weights, \$3 50@4 50; medium, \$4 50@5 50; good, \$6@8.

Leaf.—English shipping, medium to good, \$16, \$18@22; continental shipping, \$12, \$18@20.

Stemming Tobacco.—Leaf, common, \$10@13; good, \$12@15; fine \$16@20.

At Petersburg the market has been unusually active, at an advance on all desirable grades. For soft and inferior tobacco there is no demand, and sell very low. We quote good lugs from \$4@9; good leaf, \$11@15; very good, \$16@27; fine, \$35@44; fancy, \$50@55. The receipts continue to increase, the larger portions of which are of inferior grades. Receipts this week, 354 hhds; last week, 179 hhds., total since October 1, 3212 hhds.

NEW ORLEANS.—With more liberal supplies a better demand has sprung up, but the bids have not been fully up to the views of holders. However the sales of the week foot up about 570 hhds., embracing the following lots: 11 hhds. leaf at 8½c, 9 Clarksville leaf at 9c, 26 do at 10c, 4 light old leaf at 9½, 12 light leaf at 11½c, 6 choice leaf at 18c, 24 low leaf and lugs at 7c, 13 old low leaf at 7c, 1 Western district at 14c, 1 Clarksville at 15c, 31 and 38 lugs and leaf and 30 fine leaf at —, 30 low leaf at 7c, 1 do at 7c, 19 lugs and leaf at 7c, 1 lugs at 5½c, 1 admitted at 9c, 2 old admitted at 9c, 2 lugs and 3 leaf Clarksville at 10½c, 16 Western district and Clarksville at 10½c per lb; the balance on private terms—quotations ranging from 3½ to 20c for light, and 4 to 21c for heavy. Receipts for the week 526 hhds. Exports for the week, 35 hhds to New York and 3 to Galveston. Stock in warehouses and on shipboard 2,808 hhds.

MARYLAND.—At Baltimore receipts are larger both of Maryland and Ohio. The market opened very brisk for Maryland, and for the first two days there was much competition among buyers. On Wednesday and Thursday there was some abatement, though the market closed very strong and active. Of Ohio, we notice sales of 220 hhds, mostly new receipts, within our range. Kentucky is still inactive. Inspections this week 1,662 hhds. Maryland, (10 re-inspected) 577 Ohio, 37 Kentucky, and 16 Virginia—total 2,291 hhds. Cleared same time 700 hhds. to Bremen and 11 to West Indies. Stock on hand 18,272 hhds. We quote:

BREADSTUFFS.

FRIDAY, May 24, 1867, P. M.

The market has been depressed all the week, but closes with more steadiness, owing to the fact that expected supplies have not come forward.

Flour has further declined 50c. per bbl. on the average. But receipts continue light, and yesterday and to-day the trade have purchased more freely. The arrivals at the Western markets have been more liberal, but the shipments Eastward are still on a very small scale, and prices in Chicago, Milwaukee, Buffalo and Oswego are on a par with this market, with no account for transportation, but for some days have ruled extremely dull.

Wheat has been in very limited demand. The unfavorable course of the flour market has caused millers to withdraw; but holders have been very firm, and the prices show very little change from last week, except that for Prime No. 2 Club, which then sold at \$2 75 only \$2 70 is now paid. The receipts at Milwaukee and Chicago continue liberal, and we learn that at Richmond, Baltimore and Philadelphia the receipts for some days have been larger than was expected, so much so that Richmond has a surplus of flour that she sends to New York. This market is still waiting supplies of California Wheat, which are now overdue to the extent of about 120,000 bushels.

Corn declined early in the week to \$1 15 for prime new mixed, \$1 25 for prime old do. The break in the canal at Schenectady has been repaired, but we have as yet no arrivals from it. The local trade has been compelled to enter the market, and prices have advanced 7@10c. per bushel from the lowest point. A material decline in freights to Great Britain has favored shipments, but supplies have been so deficient that the shipments of the week do not exceed 65,000 to all Great Britain. The receipts of corn at the lake ports have, for the current week, been less than half as large as the corresponding period of last year. But the Ohio Valley is sending forward liberal supplies to Baltimore and other markets, from which our supplies are partially derived.

Oats have been firm with an active speculation. Rye has been steady. Barley has been more active, part for export; prime Canada being taken at \$1 05 in bond. Canada Peas have been held at \$1 30 in bond, but are now held firm at \$1 35.

LIVERPOOL, 10th May.—We have had a week of glorious growing weather and are rapidly making up for lost time. Turnip sowing too has had a better chance than at one time appeared likely. The markets, however, maintain their firm appearance; in France they have slightly retrograded. Tuesday—There were again New York orders in the market for Californian Wheat, which consequently advanced 1d @2d per cental. No change in Flour. Indian Corn dull and 3d@6d lower. To-day we had a very poor attendance and little animation. White Wheats, especially Chilian, were quite 2d cheaper. Flour too was dull and 6d@1s per sack lower. Indian Corn was offered at 4 1/2s 9d for mixed American, with a small demand only.

GROCERIES.

FRIDAY, May 24, 1867—P. M.

The grocery trade has been quite active and encouraging during the week, especially to holders of goods. The leading articles are firmer, while some are decidedly higher. Stocks in first hands are not large in any article, but in nearly all are much reduced. Unfavorable advices from some crops and a firmer gold market tends to higher prices. The trade demand has been fair for consumption, although in most instances a rigid economy is practiced, purchases being made only for the supply of immediate wants. The imports of all the leading articles continue to be about on an average scale, and are generally above rather than below the imports of last year for the period from Jan. 1st to date. The fact that stocks in first hands are steadily decreasing, while jobbers are not accumulating any excessive quantities, would show that the demand for consumption has been fully equal to the imports for the past five months.

TEA.

TEA has been less active than last week, no large lots having changed hands; but the market is steady for home use, especially for fine green and black teas. The demand at the close is fairly active. The sales for the week include 1,710 half-chests green, 1,750 do Japans, and 1,714 do Oolongs from first hands.

The weeks import includes only the cargo of the "Lord Clyde" from Amoy consisting of 9,138 lbs. Congou, 548,917 lbs. Oolongs and 3,764 lbs. Pekoe.

COFFEE.

COFFEE is fairly active and with light stocks of all kinds in first hands, prices continue firm. The advices from Rio, however, indicate liberal shipments, probably quite sufficient for the wants of trade at this port. The sales for the week include 15,250 bags Rio, 650 do Laguayra, and 800 do Maracaibo. The market closes quiet but steady at our quotations.

Imports of the week include 4,500 bags Rio per "Uller," 3,500 do per "Elise," 4,000 do per "West Indian," 8,864 do per "Merrimac," total, 20,364 bags. There were also 2,351 bags received from Laguayra, and 458 of sundries. At Baltimore, imports amount to 11,856 bags Rio, and at New Orleans, 3,057 bags of Rio.

The imports since January 1, and stock in first hands May 21, are as follows:

SUGAR.

SUGAR has been quite active for speculation and home trade during the week. The advices from Cuba are of a lighter crop, while gold is firmer and the demand for refined sugars more liberal, causing an advance of $\frac{1}{4}$ cent on all grades during the week. The sales are 8,500 hhds. Cuba and Porto Rico, and 3,200 boxes Havana.

The imports for the week at the several ports have not been very large, with the exception of Cuba sugar at this port, the details are as follows:

SPICES.

SPICES are in only light demand for immediate uses, but prices are steadily held.

FRUITS.

FOREIGN DRIED FRUITS are in light demand, chiefly for small parcels. Prices show but little variation. The offerings of foreign green fruits are less and of poorer quality. Domestic dried are in fair request at essentially unchanged rates.

The Railway Monitor.

GREAT WESTERN (CAN.) RAILWAY.—The total receipts of this company for the last five years have amounted to £3,134,190, while the expenditures, including renewals, reached to £2,330,620, leaving a net revenue of £803,570, indicating an average of £100,714 per annum. The following table shows the gross earnings and operating expenses half yearly and yearly during this period:

Gross earnings.			Operating expenses.			Nett income.
Feb.-July.	Aug.-Jan.	Year.	Feb.-July.	Aug.-Jan.	Year.	
1862-3. £246,238	£309,304	£555,542	£129,051	£309,304	£438,355	£117,187

The amount of loss on American currency has been very heavy. In the last half year it was £61,828, and for the five years £290,384, a larger sum than the nett income of any of the years in which it was made.

The percentage of working expenses, not including cost of renewals, has been as follows: In the first half of the year: 77.23; 63.59; 59.62; 64.57, and 63.29, and—in the last half of the year: 59.68; 57.11; 59.68; 55.25, and 57.49.

"The Reciprocity Treaty with the United States ended in March, 1866. The full result of its repeal has, however, been more apparent in the last half year, and while the local traffic has kept up in a very satisfactory manner, the interchange of traffic between Canada and the United States has suffered. Much of the traffic of Canada which used to pass into the United States, is now turned to the maritime provinces, and this diversion will largely increase now that confederation makes all the provinces one country. In the process of transition a less profit on the work done has, however, been earned: the traffic obtained having for the time been of less valuable character. So vast a change must necessarily bring temporary loss and disturbance, which time only can remedy and repay."

MOBILE AND OHIO RAILROAD.—The 19th annual report of this company gives the following results of operating their road for the year 1866, which we compare with those of 1860:

	1860. (415 m.)	1866. (436 m.)	Increase.
Earnings from passengers.....	\$392,247 23	\$902,719 04	\$510,471 81

Earnings less cost.....	\$695,370 13	\$1,058,887 63	\$363,517 50
Earnings per mile of road.....	3,379 00	5,037 00	1,658 00
Expenses per mile.....	1,704 00	2,861 00	1,157 00
Earnings per mile run by trains.....	1 71	2 35	0 64

The road commenced running on federal currency May 15, 1865. The earnings for the seven and a half remaining months of that year amounted to \$1,418,976 30. The earnings for the same months in 1866 amounted to \$1,496,517 86. The increase of total earnings has thus been very small, while the receipts from freight fell from \$894,541 38 in 1865 to \$833,494 29 in 1866, the cotton crop along the road having signally failed, and disappointed the natural anticipations of a largely increased business, expressed by the President in his report for 1865. The cotton transported on the road in 1866 was only about one half the quantity reported for 1860.

The financial condition of the company has not been materially changed since the previous report; on Dec. 31, 1865, the amount of indebtedness, except bonds, was \$1,492,757.53, and on Dec. 31, 1866, \$1,621,611.13. The changes in the bonded debt are as follows:

	—Am't outstanding— Dec. 31, 1865.	Dec. 31, 1866.	Difference— In-crease.	De-crease.

This shows that some progress has been made in funding; but owing to the unfavorable course of business during the past year the resumption of the payment of interest has been put off to May 1, 1868, the foreign creditors having acceded to this arrangement, with the condition that simple interest at 6 per cent. be allowed on the coupons matured, and that will mature up to Nov. 1, 1867, the company to issue for the amount, coupon bonds the same in form as the original bonds, the coupons in the meanwhile to remain in trust as collateral security. Regarding the home bonds, the President says—"As the assurance has always been given that bondholders on both sides of the Atlantic should fare as nearly alike as possible, it only remains for those on this side to enter into a similar agreement in order to close this arrangement."

A full abstract of the report for 1865 will be found in this volume of the CHRONICLE, p. 105.

UNION PACIFIC RAILROAD.—Track-laying on this road was resumed after the winter suspension on the 29th ult. About 200 miles of rail will be laid during the season, bringing the road up to the 517th milestone.

NEW YORK FIRE DEPARTMENT.—The new Fire Commissioners who were installed into office on the 1st inst. are making a thorough investigation into the condition and working of the institution with a view to its modification or reform as necessity may call for. That they have not found all things in the best of order, or under the best of regulations was scarcely to be expected, so brief has been the period since its establishment. Discipline among the men was found to be loose nor was the apparatus in the most tidy order. The old commissioners, however, are credited with many improvements over the system formerly in vogue. The present commissioners intend to separate the duties of fireman and politician effectually which is a good symptom in their doctatorial intentions. But it is not their intention to make any radical changes until they have completed their inspections; except in this, that what is good in the present regulations will be strictly enforced. The rules are to be strictly enforced, and hereafter men will be punished for visiting bar-rooms or becoming intoxicated while in uniform.

IMPORTANT

TO

BANKERS & MERCHANTS.

This Company offer for the consideration of Bankers, Merchants and those desiring the best burglar proof security the following certificates:

OFFICE OF THE NOVELTY IRON WORKS, }
New York, 18th December, 1866. }

Messrs. LEWIS LILLIE & SON,

Gentlemen,—We have subjected the sample of double-chilled iron you furnished us to the most severe tests (as regards drilling through it) we could bring to bear upon it, and without success.

It is our opinion that it can only be penetrated by the use of a large number of drills, and the expenditure of much power with days of time, and we think it impossible for a burglar with his time and power to penetrate it at all.

Yours truly,

ISAAC V. HOLMES, Supt.
LYMAN G. HALL, Foreman.

HINKLEY AND WILLIAMS WORKS, }
Boston, Mass., January 22, 1867. }

We having made an attempt to drill a sample of double chilled iron furnished us by Messrs. Lillie & Son, and failed to penetrate it more than five-eighths (5/8) of an inch, after hours of labor, feel that we can endorse the above Novelty Iron Works' certificate in all particulars.

JARVIS WILLIAMS, Treasurer.

PHILADELPHIA, PA., February 25, 1867.

Messrs. LEWIS LILLIE & SON,

Gentlemen,—We have tried a sample of double-chilled iron similar to that sent to the Novelty Works, New York, and our experience with it is about the same, viz: that it can only be penetrated by a long continued operation of the most skillful mechanics and the best tools.

Very truly,

W. H. BECHTELLE,
W. H. STRAHAN,

Foremen in Messrs. Merrick & Son's Southworth Foundry, Philadelphia, Pa.

OFFICE UNION FOUNDRY WORKS, }
Chicago, Ill., March 13, 1867. }

Messrs. MURRAY & WINNE,

Gentlemen,—We subjected the sample of new combination of metals for safes sent us by you to as thorough tests of the drill as we could, and failed to penetrate the metal at all. We think it would be impossible for burglars to enter the safes made of this metal by means of the drill during the longest time in ordinary business they could have access to them—in fact, that the metal is proof against the drill.

Truly yours,

N. S. BOUTON & CO.

OFFICE OF NORTHWESTERN MANUFACTURING CO., }
Chicago, March 11, 1867. }

Messrs. MURRAY & WINNE,

Gentlemen,—We subjected the sample you furnished us (of a new combination of metals to be used in the manufacture of Lillie's Safes) to the severest tests of our Power Drill, and with the best tempered drills our skill and experience could produce.

After operating upon it with different drills several hours without penetrating it more than half an inch and at that point unable to make further progress, we became satisfied that if not utterly impenetrable, it would at least require days of time, a large number of drills and machine power to penetrate through it; and that it was entirely out of the power of even the most skillful burglar to penetrate a safe made of this material.

ORGANIZED APRIL, 1844.

During the past year this Company has paid to its Policy-holders,

IN CASH,

a rebate on premiums in lieu of scrip, equivalent in value to an average scrip dividend of

TWENTY PER CENT.

Instead of issuing a scrip dividend to dealers, based on the principle that all classes of risks are equally profitable, this Company makes such cash abatement or discount from the current rates, when premiums are paid, as the general experience of underwriters will warrant, and the nett profits remaining at the close of the year, will be divided to the stockholders.

This Company continues to make Insurance on Marine and Inland Navigation and Transportation Risks, on the most favorable terms, including Risks on Merchandise of all kinds, Hulls, and Freight. Policies issued making loss payable in Gold or Currency, at the Office in New York, or in Sterling, at the Office of Rathbone, Bros. & Co., in Liverpool.
